PRIMARY EXAMINER

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Regarding claims 1-4 and 6-10, the allowability in combination with the other claimed features is because nowhere in the prior art is there a set of integrated arrangements having a further electrically insulating fuse interruption between the further correction capacitor in the first capacitor arrangement and the main capacitor in the second capacitor arrangement, the interruption having been produced after production of the main capacitor of the second arrangement. Regarding claims 15-17, the allowability in combination with the other claimed features is because nowhere in the prior art is there a method for producing a set of integrated grid capacitors having at least one cutout leading at least one of the shortened correction traverse electrode and to a region at which the shortened correction transverse electrode was arranged prior to the vaporation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Citation of Pertinent Prior Art

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
